03 TYPE

Fins are fletching.

SPACE GROTESK 700 · HEADINGS, LABELS, NUMBERS

39 / 3xl **Build it. Fly it.**

25 / xl **Step 3 · Fin can**

20 / lg **Where is the balance point?**

12 / xs MOTOR · BODY · FINS · NOSE · FLIGHT

INTER 400 / 600 · BODY TEXT

A rocket is stable when its balance point sits in front of its push point. The fins pull the push point back, the way feathers keep an arrow straight.

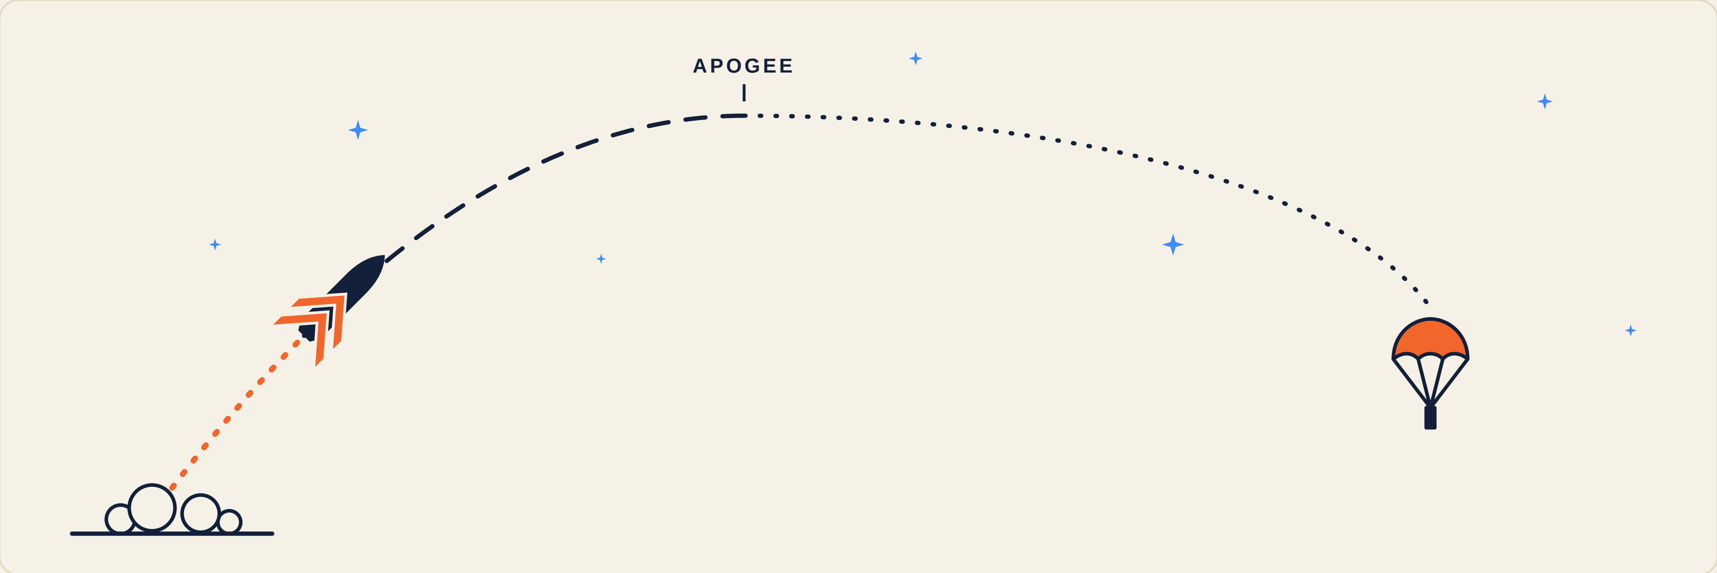
14 px in the app, 11–12 pt in print. Short sentences. One idea per sentence.

TABULAR FIGURES · SPACE GROTESK

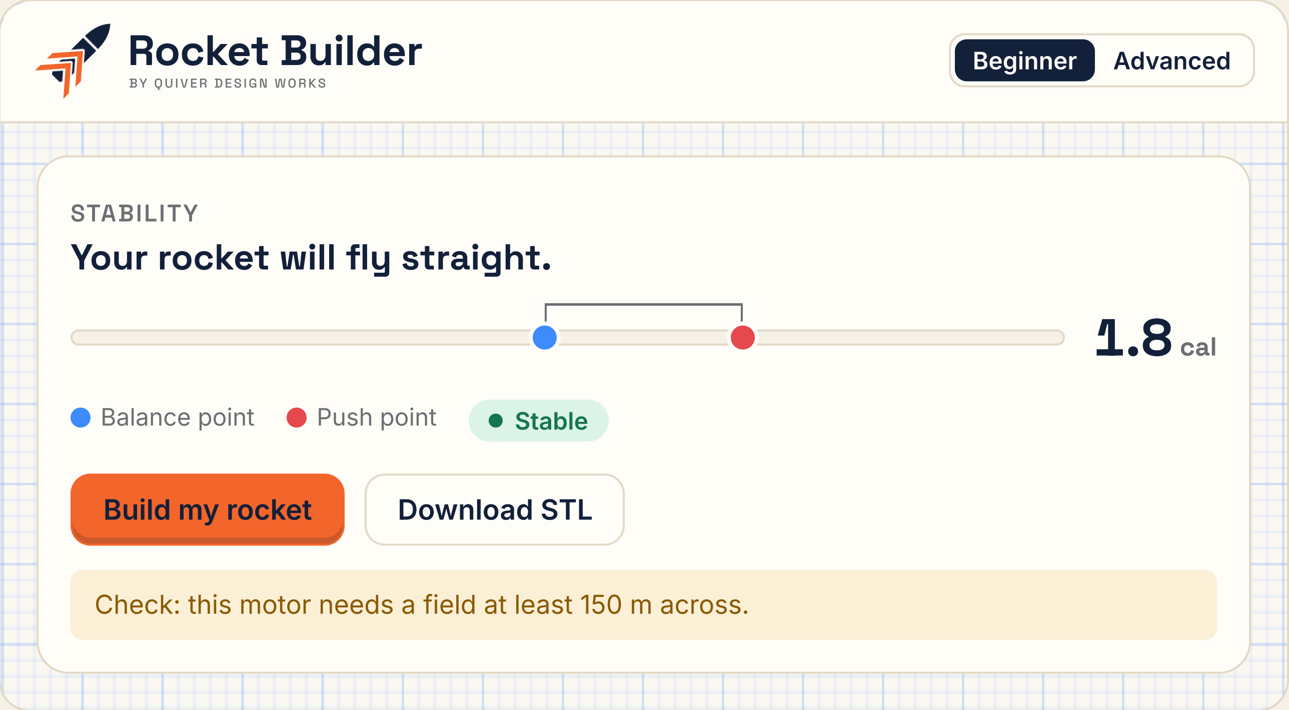
C6-5 · 24 mm · 1.8 cal · 312 m

A B C D1 **3** Part tags and step numbers: chamfered, like the Quiver letters.

04 MOTIFS



05 IN THE APP (SAMPLE, LIGHT AND DARK)



STABILITY

Your rocket will fly straight.

1.8 cal

● Balance point ● Push point ● Stable

Build my rocket | Download STL

Check: this motor needs a field at least 150 m across.

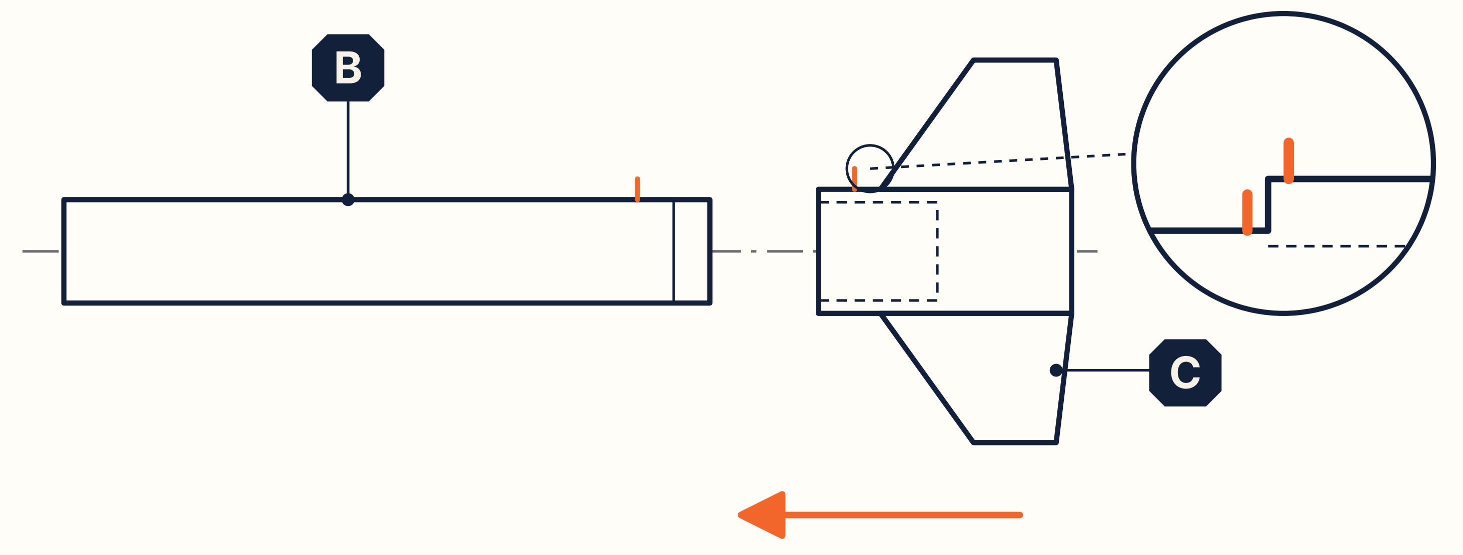
06 GUIDE DRAWING STYLE

ASSEMBLY · Fin can Skill level



3 Slide the fin can onto the tube.

Push fin can C onto body tube B. Line up the two orange marks.

It should be snug. Don't force it.

Tip Too tight? Sand the tube end lightly, then try again.

Safety Glue fumes: work by an open window.

07 VOICE

SAY IT LIKE THIS
- “Your rocket will fly straight.”
- “Move the fins back a little.”
- “An adult puts the motor in.”
- “Stand back 5 m. Count down from 5.”

NOT LIKE THIS
- “Static margin is within nominal parameters.”
- “Suboptimal fin geometry detected.”
- “DANGER!!! Rockets can kill.”
- “Awesome!!! 🚀🚀🚀”
